

5nine V2V Easy Converter

Automated VMware to Hyper-V Conversion

Summary

5nine V2V Easy Converter performs automated fast and non-intrusive conversion and fixup of selected VMware Virtual Machines to Windows Hyper-V VMs with highest conversion success ratio.

Product Description and Benefits

5nine V2V Easy Converter can be used as a standalone tool on different versions of Windows Server, including Microsoft Hyper-V Server 2012 R2/2012/2008 R2 (SP1), Windows Server 2012 R2/2012/2008 R2 (SP1) GUI and Core installations.

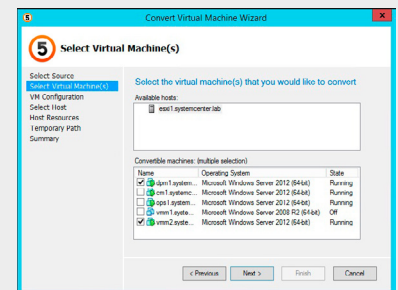

5nine V2V Converter supports conversion of Windows Server 2012 R2/2012/2008, Windows 8.x/7, Windows Server 2003 (x86 and x64), and most of Windows 2000 Advanced Server, Ubuntu and CentOS configurations.

5nine V2V Easy Converter:

- Automation via PowerShell API and command line
- Performs convenient host to host conversion
- Is fast, effective and easy to use
- Performance testing showed up to x10 times higher conversion speeds than the current competition

"I've made a seminar for some clients or Hyper-V migration and recommended 5nine's product as the conversion utility. The reason is simple - it's reliable, fast and just does the job with expected results!"
